

**Aquaz™**  
**Trinity Jacket**

\$249, [aquazfishing.net](http://aquazfishing.net)

A leading manufacturer of premium fishing gear throughout worldwide markets for over 26 years, Aquaz™ is committed to providing high quality construction and design, at very competitive pricing.

The **Trinity** wading jacket features three layer Aqualex® fabric which proved to be very water-proof and breathable. The tough nylon outer shell is sturdy enough to handle brush and branches, without feeling excessively stiff or heavy. The hood can be rolled up and snapped into the collar when not in use, and eight pockets provide plenty of storage space while keeping gear neat and organized. The collar is fleece-lined for comfort, as are the hand warmer pockets which can be zipped closed.

The cuffs are easy to adjust, too. I would select a size above what you would normally wear to ensure plenty of room for under layering and freedom of movement. Considering price point and the quality this is a good jacket.
